SUMMARY

Product-minded engineering leader with a decade building and scaling developer platforms, payments infrastructure, and high-traffic e-commerce systems across two venture-backed startups.

EXPERIENCE

Staff Software Engineer · Northwind Labs

Austin, TX | Mar 2021 - Present

- Led migration of the checkout service to a sharded datastore, cutting p99 latency 42% across 30M monthly transactions.
- Built an internal experimentation platform adopted by 14 product teams within two quarters.
- Mentored 6 engineers and established the team's code-review and on-call rotation standards.

Senior Engineer · Cedar & Pine Software

Remote | Jun 2017 - Feb 2021

- Designed a fault-tolerant event pipeline processing 2B events per day with 99.99% delivery.
- Reduced infrastructure spend 28% by right-sizing compute and introducing tiered storage.

ACHIEVEMENTS

- Patent · System and method for ranking e-commerce product catalogs. [2019]
- Publication · Co-authored 5 peer-reviewed papers on Web Accessibility. [2009]
- Exit · Founded and sold a logistics startup to a NASDAQ-listed acquirer. [2000]

EDUCATION

B.S. in Computer Science — State University

2013

SKILLS

TypeScript, Go, Python, Kubernetes, PostgreSQL, Kafka, AWS, Terraform, GraphQL, React, distributed systems, observability
